

AUTOMATION SOLUTIONS THAT WORK!

Welding automation gives you advantages such as:

- lower manufacturing costs
- better weld quality
- an enhanced working environment
- much higher productivity

Bringing you the most extensive automation solutions available in the marketplace.

The seamless integration for automation in the job shop makes learning the process easier, allowing you to concentrate on other areas of your business. Let Weldstar/Depke analyze your automation needs and bring the best available solution to you.

Weldstar/Depke technical representatives are trained in a variety of welding automation applications including:

- Robotic Work Cell Solutions
- Collaborative Robot (cobot)
- Seam Welding and Tracking
- Orbital Welding
- Fixturing and Positioning Equipment
- Automated Plasma and Cutting Operations
- Circumferential Welders
- Subarc Systems

"Peddinghaus Corporation benefits from our partnership with Weldstar on many levels. We not only receive quality products for use in our Fabrication Shop and on the machine tool products that we manufacture, but also reap the rewards of many value-added services unique to the Weldstar Company."

ADAM GROMER
Quality Service Manager
